

Parika Mahajan
Batch of 2017-19
Sustainability & Environment Specialist
Flipkart

My journey at School of Sustainability, XUB set me on a career defining path. When I joined here, I came with a clear vision of the desired outcomes and that helped me to a great extent. Courses here are very much aligned with today's business needs. Entire MBA course right from Day-1 inculcates the sense of importance to absorb multiple inputs at any given point in time. As an operations management major, I learnt to apply the core knowledge to present industry scenario and thereby designing sustainable solutions. Case study pedagogy has helped me in understanding the real-time scenarios, especially decision modelling. Having studied courses focusing on entire value chain of the organization, I work with much more clarity. Our winter internship, Sustainability Discovery Program is another pillar which reinforces the need to feel and understand the community challenges first hand. Various student engagement activities have also shaped me to deal with the issues and challenges more efficiently in my professional life.
